Meeting Topics Discussion about the project requirements			

Meeting Key Takeouts

1.   Team member introduction: Everyone introduced their project experience and background briefly.

2.   Project introduction
-       Dr. Nguyen introduced the project in detail and the main requirements:
a.   Use React to design the interface with 2 main features.
        i. Dashboard for selecting function - React Admin
        ii. Drag and Drop - React Flow
b.   Extend NVAL with 2 more block chain protocols.
c.   Evaluate this tool by testing on real hardware.

3.   Tasks in the first two weeks:
-       Mockup & user interface design based on existing data structure
-       Make a development plan
-       Familiar with API
-       Familiar with json data structure
-       Consider function requirements and write the user story
-       Consider the extensibility and maintainability of coding

4.   Project management
-       Create a project backlog on GitHub to manage the project.

5.   Meeting arrangement
-       Once a week: for project discussion, update and monitoring
-       Next meeting will be on next Thursday (3.9).
